DESIGN FLOORING

Frontier Design Flooring products are created to bring you the latest in fashionable colours and quality construction in a range of formats that allow you to create your dream interior.

The product ranges are designed to allow maximum versatility of application through carefully chosen specifications that will allow these products to be installed in a broad range of settings, whether large or small, residential or commercial, including wet or dry areas.

All of the products in the Frontier Design Flooring portfolio are impervious to the effects of moisture and feature simple and reliable installation systems, ensuring long-term performance and customer satisfaction.
