Matching accessories guide

Discover our passion for...

nature

Most of our floors are PEFC certified, which endorses our use of sustainably managed forests.

natural knots

Some of our floors have knots that are only partially filled, others have knots that are sanded by hand. All this is done to emphasize the natural beauty of the wood.

design

We aim for the perfect balance between the type of wood, grading, colour, structure, finishing and plank size.

authenticity

By using different treatment techniques such as fuming and special staining, each plank has a unique colour. Thanks to these treatments, we create a lively colour variation between the planks. These effects bring the authentic character of nature into your home.

artisan characteristics

Saw cuts are tangible evidence of pure craftsmanship. The manually applied saw cuts vary both in depth, width and frequency. Not a single plank is identical!

craftsmanship

A Variano plank consists of multiple small boards and is composed by hand, with an eye for detail.

details

Our reclaimed look of Quick-Step Variano shows saw cuts, height differences and small gaps.

perfect finishing

Some of our floors look as matte as untreated wood, and are also easy to maintain.

wooden textures

A brushed finish accentuates the natural grain of the wood and creates an extra authentic feel.

Authentic beauty meets easy living

Maximum pleasure,
easy maintenance

All Quick-Step timber floors are finished with an advanced lacquer to give your floor added resistance to wear, marks and scratches. The new water-repellent Protect+ technology also helps to prevent water from penetrating between joints of your floor as this often makes joints look tired or stained. This helps to keep the joints between the planks looking as good as new. Thanks to the unique combination of this new technology and our authentic floor designs, you will be able to enjoy your floor's beauty for years to come.

UNIQUE INNOVATION!

SURFACE & EDGE PROTECT+ TECHNOLOGY

Our new Surface & Edge Protect+ technology can help to prevent mud, spilled foods and other dirt from getting stuck in the joints and texture of the wood. This will help to make your Quick-Step timber much easier to clean (to read more, see p. 8-9).

Quick-Step Timber, the beauty of nature

Welcome the beauty of nature into your home by choosing a 100% real timber floor from Quick-Step. With a wide choice of different plank sizes and natural colours, you will find the perfect floor for your style and interior. We pay extra attention to the knots, grain and colour of the planks so you get to enjoy the warmth of a handcrafted timber floor.

A perfectly installed floor is just a few clicks away

A timber floor that's easy to install? Quick-Step makes it possible. Whether you decide to do it yourself or have it done by a professional, your new floor can be installed in no time, thanks to the Uniclic® Multifit system. This click system enables you to click the planks together, using three different methods. Visit www.quick-step.com.au for more information.

Another great advantage of Quick-Step timber floors: there's no need for post-installation work in order to start living on your floor. No sanding, no dust, no varnishing, oiling or painting. As soon as your Quick-Step Timber floor is installed, it's yours to enjoy for years to come.

How to install your timber floor

Installing a Quick-Step Timber floor is very easy. Let us help you out with our installation videos at bit.ly/ytquickstep

Enjoy your timber floor worry-free thanks to its unique coating

If you're opting for a timber floor, you'll want to retain its authentic beauty for as long as you can. Timber floors from Quick-Step have been designed with exactly this in mind, and with the aim of creating warmth in the home for many years of enjoyment without worry.

Resistance to wear and tear

Sliding chairs, high heels, children playing... floors go through a lot. All Quick-Step timber floors have an additional, high-quality protective layer of lacquer.

For extra protection against dirty edges and joints

Thanks to the unique, moisture-repellent joint technology Edge Protect+, there's no need to worry if you spill something or while cleaning, as Edge Protect+ stops fluids from seeping into the timber and dirtying the joints, keeping the space between the planks clean and looking fresh for years to come, even with frequent cleaning.

WITHOUT EDGE PROTECT+ TECHNOLOGY

WITH EDGE PROTECT+ TECHNOLOGY

UNIQUE INNOVATION FROM 2019

SURFACE PROTECT+ TECHNOLOGY

Cleaning your timber floor is now easier than ever

Muddy boots, chocolate sauce, wine or other dirt on your timber floor? No need to worry! Your Quick-Step timber floor with lacquer finish is now even easier to keep clean.

Surface Protect+ technology prevents dirt and grime from being trapped within the open grain of your timber floor. This means a timber floor that looks better for longer, even with repeated cleaning.

Looking for a timber floor that is easy to maintain? Quick-Step has exactly what you're looking for.

WITHOUT SURFACE PROTECT+ TECHNOLOGY

Product build-up

- High quality lacquer finish
- Solid hardwood face layer
- Plantation hardwood Hevea core (Compact range: HDF)
- Plantation Nordic spruce backing

thickness	grooves	build-up	pack	warranty
÷ 14 mm			6 x  = 2.455 m ² *	 
÷ 14 mm			5 x  = 1.628 m ² *	 
÷ 14 mm			5 x  = 1.762m ² *	 
÷ 14 mm			6x  = 2.455m ²	 
÷ 14 mm			6 x  = 2.508 m ²	 
÷ 14 mm			6 x  = 2.508m ² *	 
÷ 14 mm			6 x  = 2.508m ² *	 
÷ 12.5 mm			6 x  = 1.583 m ² /1.419m ² *	 

Please note: Many 1 strip products feature shorter boards. At Quick-Step, we know that when you want a stunning 1 strip floor, you don't want it full of short boards, that's why we have produced longer boards than almost every other brand, to give you the look you want. Our balance of short boards adds authenticity to your floor. This costs a little more, but looks so much better. Another great reason to buy a Quick-Step floor.

* up to 6 shorter boards per pack

All timber ranges are PEFC certified, except ReadyFlor, which is sourced from sustainable forestry

The details make the difference

Each timber floor has its own story and a unique look and feel. The Quick-Step designers carefully select the structure, treatment, finishing and bevel, perfectly in line with the character of each floor design.

Types of wood

Blackbutt

Blackbutt is an Australian hardwood with excellent hardness. It may contain prominent gum veins, insect marks as well as some fine surface cracks. Not recommended with heated subfloors

Tasmanian Oak

Tasmanian Oak is a blend of pink/straw coloured hardwood species of moderate hardness from Tasmania. Some small surface splits or surface checks are an occasional characteristic of Tasmanian Oak.

Spotted Gum

Spotted Gum is an Australian hardwood with wide colour variation and excellent hardness. It may contain some fine surface cracks. This wood species is not recommended with heated subfloors.

Sydney Blue Gum

Sydney Blue Gum is an Australian hardwood with wide colour variation and excellent hardness.

Jarrah

Jarrah is a very durable hardwood from WA, which ranges in colour from pale pink/grey to deep reds. It will darken, turning a deeper red and more uniform in colour.

Oak

European Oak is extremely popular and ranges in colour from pale straw to mid brown. Knots and medullary rays are a real feature of this stunning hardwood..

Merbau

Merbau is a reddish brown hardwood of excellent durability from South East Asia. It often contains a small yellowish fleck in the grain.

*Hardness Janka rating

The rating is a measure of the resistance of the wood to indentation. The higher the number, the more indentation resistant the timber.

Finishing

All Quick-Step Timber floors are prefinished in the factory, which means no oiling or lacquering is needed directly after installation.

Lacquered finish

 Extra matt

 Matt

 Low Sheen

 Gloss

- 7 layers of protective lacquer.
- Highly scratch and wear resistant.
- Protects against household chemicals.
- Easy to clean timber floor.

Masters of our craft

At Quick-Step, we're passionate about the beauty of wood. That's why we only use the finest wood for our timber floors. We work with traditional, high-quality materials and handle them with the greatest care and attention, yet we never cease to innovate when it comes to interior design. Learn more about our passion on page 4 - 5.

Grading

All Australian wood varieties are graded as per AS2796 Standard and better. This grade includes knots, gum veins, fine cracks, and other natural features of Australian Eucalypts. For oak we have a unique grading system that sorts our floors into three different categories. It gives you an idea of how your floor will look. Quick-Step Oak flooring is available in 1 of 3 grades:

Nature

Wood with small knots. Light variation in colour and structure.

Marquant

Wood with large knots. Lively variation in colour and structure.

Vibrant

Wood with large knots and small cracks. Lively variation in colour and structure with a rustic appearance.

COLOUR KNOTS CRACKS	Nature	Marquant	Vibrant
	Natural colour	Lively variation	Lively variation
	Max. 20 mm	Max. 50 mm	Max. 80 mm
	Not allowed	Not allowed	

Treatment

Brushed Deep Brushed

Brushing accentuates the natural grain structure of the timber plank and adds depth.

Saw cuts

Random saw marks show the craftsmanship and character of the timber planks.

Timeworn

Sloping, slightly worn edges create an aged look. End bevels will show natural variations

Natural knots

On some floors the knots are not fully filled. Some of them are even manually sanded to emphasize the liveliness of the wood.

Reclaimed look

Our Variano floors are designed with a reclaimed look: showing saw cuts, height differences and small gaps. See p. 23.

Design colours

By using different treatment techniques such as fuming and staining, each plank has a unique colour.

STEP 1 INSTALLATION

Install your floor without a hassle!

Laying a Quick-Step floor is so easy thanks to the patented world-famous Uniclic® Multifit click system. This system is highly user-friendly, quicker to install and a lot more solid than other systems. A Quick-Step floor makes installation easy, even in the tightest corners or under doors.

1 Effortless installation, thanks to the Uniclic® Multifit click system

Quick-Step is the inventor of the Uniclic® Multifit installation system, today the standard click-to-install system. Use this revolutionary and patented click system to effortlessly click your floor planks together.

2 Install your floor anywhere, even on floor heating

Quick-Step Timber floors are perfect for installing over floor heating when combined with the right underlay. Some species are not suitable, see page 18.

3 Watch the videos

See for yourself how easy it is to install a Quick-Step floor in our installation videos. Discover them on www.quick-step.com.au.

Installation tools

Install your timber floor in an easy and professional way with the handy Quick-Step installation tools.

Quick-Step® HANDSAW

Handy handsaw used to undercut door frames.

Quick-Step® INSTALLATION KIT

Includes a special Uniclic® tapping block, pulling tool and spacing wedges.

For a perfect installation, check out the installation videos on www.quick-step.com.au

Underlay is not an idle luxury

CLICK on timber

Installing your timber floor is easy thanks to the patented Uniclic® Multifit click system. A good underlay has a major impact on the final look, walk sound, quality and comfort of your Quick-Step Timber floor.

- Maintain their initial thickness over the years and provide excellent acoustic insulation, keeping your floor quieter underfoot.
- Levels and helps to prevent small irregularities.
- Comes with a self-adhesive strip and a pre-integrated damp proof membrane (DPM) which protects your floor from rising damp, with a water vapour resistance of greater than $SD > 75m$, meeting all European recommendations.
- Suitable for floor heating and/or cooling.
- Offers a stable base which supports your floor in instances of dropped items or temporary heavy loads.

Quick-Step® COMBI-LAY STANDARD

Contents:
1 roll = 20 or 50 m²
Thickness: 2 mm

Combi-Lay Standard is no normal underlay. The dense, closed cell polyolefin foam provides excellent support, with good reduction of both reflected and impact noise.

Quick-Step® QUIET-STEP COMBI-LAY

Contents:
1 roll = 20 or 50 m²
Thickness: 2 mm

Quiet-Step Combi-Lay is the first choice where a quiet walking sound and maximum reduction in multi-storey noise is required. This high density underlay has no match when it comes to reducing foot fall noise, with a reduction of up to 30% over standard underlays. Ideal for installation in multi-storey apartments where noise transfer can be an issue.

For the best results always start with a level subfloor. Make sure it's completely dry as well. **For more advice about preparing your subfloor, visit www.quick-step.com.au or your local Quick-Step retailer.**

GLUE

Quick-Step Timber can also be glued down using Quick-Step Parquet Adhesive.

- Spreads easily and guarantees great adhesion.
- Suitable for floor heating and/or cooling.

Please note: Contact your Quick-Step retailer for more details on gluing a Quick-Step Timber floor.

STEP 2 FINISHING

Finish beautifully

Finish your floor beautifully with the Quick-Step scotia and profiles.

Finishing profiles for floor and stairs

Quick-Step's Incizo® profile is a multifunctional finishing tool. The same profile can be used for all the finishes of your floor and stairs, in the matching colour. Simply cut the Incizo® basic profile to the shape required using the special cutter supplied in every Incizo pack.

Quick-Step® Incizo®: five questions, one answer

1 How can I join two floors of the same height?

Use the Incizo® profile cut as an expansion profile.

2 How can I solve variations in height from one floor to another?

Use the Incizo® profile cut as an adapter profile.

3 How do I finish my floor along a wall or a window?

Use the Incizo® profile cut as an end profile.

4 How can I connect my floor to a carpet, and have a beautiful finish?

Use the Incizo® profile cut as a transition profile.

COM3845

For safety reasons, always glue the floor panels on the stairs of your staircase.

5 What about the finishing of my stairs?

You can cover your stairs or steps with Quick-Step planks and finish in the style of your choice using the Incizo® profile as a stair nose. Remember to order the Incizo aluminium sub-profile for stair installations.

Quick-Step®

STEP 3 CLEANING

Keep your floor in top condition

QSSPRAYKIT

Quick-Step® CLEANING KIT

Contents: mop holder, washable microfibre mop,
Quick-Step Cleaning product 1000 ml

The cleaning products are specifically developed for Quick-Step floors. They cleanse the floor surface thoroughly and maintain the original look of your floor. No residual layers of cleaning product are left behind.

Also available separately:

Quick-Step® CLEANING PRODUCT 1000 ML

QSCLEANING1000

Quick-Step® CLEANING MOP

QSSPRAYMOP

Quick-Step® REPAIR KIT

QSREPAIR

Contents: melting knife, cleaning comb,
7 wax blocks, sanding pad

Light damages can easily be repaired in the original colour with the Repair Kit. Simply recreate the colour of your damaged planks with one of the seven wax pieces selected to cover all Quick-Step colours. Check the specific colour combination for your floor on www.quick-step.com.au

Check the specific colour combination for your floor
on www.quick-step.com.au

Tips to keep your floor in top condition: Placing dirt trapping mats at external entrances and felt floor protectors under all furniture is recommended. Where possible, use rubberised castors and wheels designed for hard flooring and vinyl chair mats under castor wheels and office chairs. Remove small stones and grit with a soft bristle broom or vacuum to help prevent scratching. Quick-Step Timber should also be protected from excessive heat and sunlight. The use of steam mops and stiletto heels should also be avoided at all times. For regular maintenance, use the Quick-Step Timber Cleaning Kit for best results. (For full maintenance guidelines go to www.quick-step.com.au)

There is no substitute for quality

When looking at any pre-finished timber floor it is important to pay serious attention to the wear resistance of the coatings used. After all, it is the coating that will afford protection to the timber surface of your floor and the better the quality of the finish used, the longer your floor will look its very best.

Wear resistance, or abrasion resistance, is tested using a taber abrasion machine that simulates day to day wear of the coating system. Taber testing is universally recognised as the best testing method to evaluate the wear performance of a floor covering. In essence, the better the abrasion resistance, the longer your floor will hold its initial gloss level and the longer the coating will last before wearing through to raw timber.

Most competitors use a standard "off the shelf" finish that wears reasonably well, but that's simply not good enough for the designers at Quick-Step.

SRT Finish is a specifically formulated, high performance lacquer that has been developed in Europe and used on all lacquered Quick-Step Timber floors. Laboratory tests clearly demonstrate that Quick-Step's SRT Finish outperforms the competitors, ensuring that when you choose a Quick-Step floor, you are selecting a timber floor with only the best available pre-finished coatings available. What's more, SRT is able to be re-coated using a wide selection of local finishes, meaning trouble free maintenance when it comes time to replenish the coated surface of your floor in years to come.

A heart for nature

Wood is one of very few renewable source material for floor coverings and for many years Quick-Step has gone the extra mile to limit the environmental impact of its activities. All the wood used to manufacture our engineered timber floors is sourced from sustainably managed forests. Moreover, our glue and lacquer meet the strictest international emission norms and we only work with efficient and durable production processes. All of this means you can simply enjoy your timber floor knowing it was made with respect for the environment and your family's health.

- ☑ More than 75% recycled, sustainable wood
- ☑ We use carefully screened raw materials
- ☑ We invest in energy-efficient production

Matching Accessories Guide

Flawlessly matching accessories are available in all Quick-Step timber products. Quick-Step is committed to perfecting all aspects of flooring by meticulously colour-matching trims and profiles for all applications including stairs across all timber ranges.
